### San Diego Association of Governments

### TRANSPORTATION COMMITTEE

October 15, 2004 AGENDA REPORT NO.: 3

**Action Requested: APPROVE** 

2004 REGIONAL TRANSPORTATION IMPROVEMENT PROGRAM (RTIP) AMENDMENT NO. 1

#### Introduction

As the Metropolitan Planning Organization (MPO), SANDAG is responsible for the adoption of the biennial Regional Transportation Improvement Program (RTIP). The SANDAG Board adopted the 2004 RTIP including its Air Quality conformity determination and the conformity redetermination of the 2030 Revenue Constrained Regional Transportation Plan at its meeting on July 23, 2004. The Federal Highway Administration (FHWA)/Federal Transit Administration (FTA) approved the 2004 RTIP on October 4, 2004.

The 2004 RTIP must conform to the State Implementation Plan (SIP) for air quality. Conformity to the SIP means that transportation activities in the 2004 RTIP will not create new air quality violations, worsen existing violations, or delay the attainment of the national ambient air quality standards for the San Diego region.

Over the past several months SANDAG has received requests to add several new capacity-increasing projects as well as revisions to existing projects to the 2004 RTIP. The addition of capacity-increasing projects to the approved RTIP requires a new regional emissions analysis. SANDAG updated the regional emissions analysis and released a draft report for public review on August 30, 2004. No comments were received by the end of the comment period on September 30, 2004.

Another federal requirement is that the RTIP be fiscally constrained; that is, a region must demonstrate that sufficient revenues are available to implement the proposed projects programmed in the RTIP. This report represents the final Air Quality Emissions Analysis incorporating the new capacity increasing projects, the revisions to other projects, and validates that the 2004 RTIP is fiscally constrained.

#### Recommendation

It is recommended that the Transportation Committee adopt Resolution No. 2005-09, approving Amendment No. 1 to the 2004 RTIP. The total program is shown in Table 1 while 2004 Regional Transportation Improvement Program, Amendment No. 1 (Attachment 1) details the projects being amended, the air quality emissions, and the fiscal constraint analyses.

#### Discussion

The 2004 RTIP is a \$5 billion, five-year program of major transportation projects in the San Diego region covering the period from FY 2004/05 to FY 2008/09. The 2004 RTIP is designed to implement the region's overall strategy for enhancing mobility and improving the efficiency and safety of the

transportation system, while reducing transportation-related air pollution in support of efforts to attain federal and state air quality standards for the region. The 2004 RTIP also incrementally develops the adopted RTP, MOBILITY 2030 for the San Diego region.

#### Fiscal Constraint Analysis

Federal regulations require the 2004 RTIP be a revenue-constrained document with programmed projects based upon available or committed funding and/or reasonable estimates of future funding. Funding assumptions are generally based upon: (1) authorized or appropriated levels of federal and state funding from current legislation; (2) conservative projections of future federal and state funding based upon a continuation of current funding levels; (3) the most current revenue forecasts for the *TransNet* program; and (4) the planning and programming documents of the local transportation providers.

Chapter 2 of Attachment 1 provides updated program summaries. (Chapter 4 of the Final 2004 RTIP discusses in detail the financial capacity analysis of major program areas including discussion of available revenues.). Based upon the analysis, the projects contained within the 2004 RTIP, including the projects in Amendment No. 1, are reasonable when considering available funding sources.

### Air Quality Analysis

Federal metropolitan planning and air quality regulations prescribe the process for determining air quality conformity. These regulations require that the RTIP: (1) provide for the timely implementation of transportation control measures (TCMs); (2) include a quantitative emissions analysis of projects programmed in the RTIP, including all regionally significant projects; and (3) be within the region's emissions budgets (targets) included in the approved SIP.

A quantitative air quality emissions analysis, including the new projects proposed in Amendment No. 1, was conducted for the years 2010, 2014, 2020, and 2030 revenue-constrained transportation scenarios. The results of this analysis are included in Chapter 3 of Attachment 1. The draft report was released for a 30-day pubic comment and review on August 30, 2004, and also was reviewed by the San Diego Region Conformity Working Group (CWG) at its meeting on September 22, 2004. The CWG is an interagency consultation group made up of various transportation and air quality agencies including the San Diego Air Pollution Control District, Caltrans, California Air Resources Board, the U.S Department of Transportation, and the U.S. Environmental Protection Agency. No comments were received as of the comment period deadline (September 30, 2004).

Based on the analysis, the 2004 RTIP Amendment No. 1 meets the conditions for determining conformity with the applicable SIP for air quality.

## RESOLUTION NO. 2005-09

### RESOLUTION APPROVING AMENDMENT NO. 1 TO THE 2004 REGIONAL TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, on July 23, 2004, SANDAG adopted the 2004 Regional Transportation Improvement Program (RTIP), including the Air Quality conformity determination and the conformity redetermination of the 2030 Revenue Constrained Regional Transportation Plan (RTP) with the State Implementation Plan (SIP) for air quality; and

WHEREAS, various agencies have requested the addition of new capacity increasing projects as well as revisions to existing projects for inclusion in the 2004 RTIP; and

WHEREAS, the proposed amendment is consistent with the 2030 RTP; and

WHEREAS, the updated Air Quality Conformity report for Amendment No. 1 to the 2004 RTIP as shown in Attachment 1 has been found to be in conformance with the 1998 Regional Air Quality Strategy (RAQS)/1982 State Implementation Plan (SIP); and

WHEREAS, Amendment No. 1 to the 2004 RTIP continues to provide for timely implementation of transportation control measures contained in the adopted RAQS/SIP for air quality and a quantitative emissions analysis demonstrates that the implementation of the RTIP projects and programs meet all the federally required emissions budget targets; and

WHEREAS, the public and affected agencies have been provided notice of and an opportunity to comment on Amendment No. 1 to the 2004 RTIP and its air quality conformity determination; and

WHEREAS, the SANDAG Board of Directors delegated the authority for RTIP amendments including findings of air quality conformity to the Transportation Committee; NOW THEREFORE

BE IT RESOLVED that the Transportation Committee does hereby approve Attachment 1 as Amendment No. 1 to the 2004 Regional Transportation Improvement Program;

BE IT FURTHER RESOLVED that Amendment No. 1 to the 2004 RTIP is consistent with SANDAG Intergovernmental Review Procedures; and

BE IT FURTHER RESOLVED that Amendment No. 1 to the 2004 RTIP is consistent with SANDAG Public Participation Policy.

PASSED AND ADOPTED this 15<sup>th</sup> day of October 2004.

	ATTEST:		
CHAIRDERSON		SECRETARY

# Chapter 1 EXECUTIVE SUMMARY

### **Chapter 1**

### **EXECUTIVE SUMMARY**

#### **OVERVIEW**

The 2004 Regional Transportation Improvement Program (RTIP) is a five-year program of major transportation projects funded by federal, state, *TransNet* local sales tax, and other local funding covering the period FY 2004/05 to FY 2008/09. The RTIP, which includes an air quality emissions analysis for all regionally significant projects, requires the approval by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA). Amendment No. 1 includes various revisions to existing projects, including changes as a result of the final 2004 State Transportation Improvement Program (STIP) adopted by the California Transportation Commission (CTC) on August 5, 2004, and adds capacity increasing projects to the 2004 RTIP prompting an update to the regional emissions analysis.

The RTIP is a prioritized program designed to implement the region's overall strategy for providing mobility and improving the efficiency and safety of the transportation system, while reducing transportation-related air pollution in support of efforts to attain federal and state air quality standards for the region. The 2004 RTIP also incrementally develops the 2030 Regional Transportation Plan (RTP), the adopted long-range transportation plan for the San Diego region.

The Final 2004 RTIP, including the air quality emissions analysis, is scheduled to be approved by FHWA and FTA on October 4, 2004. Amendment No. 1 to the 2004 RTIP revises existing projects and adds capacity increasing projects. The 2004 RTIP document, published in July 2004, fully documents the RTIP development process, project listings, financial capacity analysis, and the air quality conformity analysis. This report focuses on updated fiscal capacity analysis and new regional air quality emissions analysis for conformity purposes. The Final 2004 RTIP document also is available on the SANDAG Web site.

### Consistency with the 2030 RTP

On April 9, 2003, FHWA and FTA issued a finding that the SANDAG 2030 RTP was in conformance with federal air quality and planning regulations. The 2004 RTIP, including Amendment No. 1, is consistent with the 2030 RTP. As a financially-constrained document, the 2004 RTIP contains only those major transportation projects listed in the revenue-constrained plan of the 2030 RTP.

### **Financial Capacity Analysis**

Federal regulations require the 2004 RTIP to be a revenue-constrained document with programmed projects based upon available or committed funding and/or reasonable estimates of future funding. Funding assumptions are generally based upon: (1) authorized or appropriated levels of federal and state funding from current legislation; (2) conservative projections of future federal and state

funding based upon a continuation of current funding levels; (3) the most current revenue forecasts for the *TransNet* program; and (4) the planning and programming documents of the local transportation providers.

Chapter 4 of the Final 2004 RTIP discusses in detail the financial capacity analysis of major program areas including discussion of available revenues. Chapter 2 of this report provides updated program summaries. Based upon this analysis, the projects contained within the 2004 RTIP, including the projects in Amendment No. 1, are reasonable when considering available funding sources. Table 1-2 includes the projects proposed for Amendment No. 1.

### **Air Quality Conformity Determination**

Federal metropolitan planning and air quality regulations prescribe the process for determining air quality conformity. These regulations require that the proposed RTIP: (1) provide for the timely implementation of transportation control measures (TCMs); (2) include a quantitative emissions analysis of projects programmed in the RTIP, including all regionally significant projects; and (3) be within the region's emissions budgets (targets) included in the approved State Implementation Plan (SIP).

The 2004 RTIP programs substantial funds for the implementation of the four TCMs (identified as "T-tactics") adopted in the 1982 Regional Air Quality Strategy (RAQS)/1982 SIP for air quality improvement. As shown in Table 1-1, the TCMs/T-tactic projects programmed for implementation total approximately \$1.7 billion, or 34 percent of the total funds programmed. Included are \$26.5 million for Ridesharing, \$1.5 billion for Transit Improvements, \$50 million for Bicycle Facilities and Programs, and \$83.3 million for Traffic Flow Improvements. Based upon this analysis, the 2004 RTIP, Amendment No. 1 provides for the expeditious implementation of the four existing TCMs in the 1982 Revised RAQS, which remain the federally approved TCMs for the San Diego region.

Quantitative air quality emissions analyses were conducted for the years 2010, 2014, 2020, and 2030 Revenue Constrained transportation scenarios, as shown in Chapter 3. A draft report that discusses the results of this analysis, including Amendment No. 1, was released for public comment on August 30, 2004, and reviewed by the San Diego Region Conformity Working Group (CWG) at its meeting on September 15, 2004. The 2004 RTIP Amendment No. 1 meets the conditions for determining conformity with the applicable SIP for air quality. A detailed description of the regional emissions analysis and modeling procedures conducted for the 2004 RTIP is included in Appendix C of the Final 2004 RTIP. Chapter 3 of this report summarizes the air quality conformity analysis for Amendment No. 1.

### **Public Participation**

It is the policy of SANDAG to encourage public participation in the development of agency planning and programming activities. Public involvement consists of participation on various SANDAG working groups, opportunities to comment at SANDAG Board and committee meetings, public notices of document availability and public hearings, and through the SANDAG public communications program. For the 2004 RTIP process, SANDAG solicited the participation from the 17 tribal governments along with the Reservation Transportation Authority in San Diego County. Appendix A in the Final 2004 RTIP describes the SANDAG public participation process.

# Chapter 2 FINANCIAL CAPACITY ANALYSIS

### **Chapter 2**

### FINANCIAL CAPACITY ANALYSIS

This chapter provides an update to the analysis of the financial capacity of the region's transportation agencies to implement the programmed projects. Financial capacity is measured by a comparison of the total cost of the proposed projects against the available revenues and a test of the reasonableness of the revenue assumptions.

Overview of the program and available revenues by funding sources are provided for all projects included in Chapter 4 of the Final 2004 RTIP. The assumptions used in the forecasts of available funding are based upon information in the Final 2004 State Transportation Improvement Program (STIP) adopted by the California Transportation Commission (CTC) on August 5, 2004, forecasts provided by the California Department of Transportation, and other forecasts of ongoing transportation funding programs.

#### PROGRAM AND REVENUES

Table 2-1a summarizes the program by major funding source (i.e., federal, state, and local), Table 2-1b summaries the revenues available to implement the programmed projects, and Table 2-c provides the remaining revenues available for additional programming. Tables 2-1a to 2-1c include all costs and revenues for all projects in the 2004 RTIP including Amendment No. 1.

Table 2-1a

# Chapter 3 AIR QUALITY CONFORMITY ANALYSIS

### **Chapter 3**

### AIR QUALITY CONFORMITY ANALYSIS

The San Diego region has been designated by the U.S. Environmental Protection Agency (EPA) as a federal maintenance area for the 1-Hour Ozone and Carbon Monoxide (CO) standards. The San Diego region attained the federal 1-Hour ozone standard in 2001. The U.S. EPA redesignated the San Diego air basin as attainment/maintenance and approved the 1-Hour Ozone Maintenance Plan as a State Implementation Plan (SIP) revision, effective on July 28, 2003.

The U.S. EPA has added two new standards to protect public health: one measures ozone levels over eight-hour periods and the other one measures smaller particulate matter (PM) in the air. The more stringent 8-Hour Ozone standard will protect the public against longer exposure periods. PM<sub>2.5,</sub> the new fine particulate matter standard, will focus more protection against the smaller particles, which pose an increased health risk.

On April 15, 2004, U.S. EPA designated the San Diego region as a Basic non-attainment for the 8-Hour ozone standard, under Subpart 1 of the Clean Air Act. This designation took effect on June 15, 2004. SANDAG must demonstrate conformity of both the RTP and RTIP to the 8-Hour Ozone standard by June 15, 2005. A new conformity determination will be conducted in the next few months to ensure this deadline is met. The  $PM_{2.5}$  designation is expected in November or December 2004.

### **DEVELOPMENT OF TRANSPORTATION CONTROL MEASURES**

In 1982, SANDAG adopted four transportation tactics (T-tactics) as elements of the 1982 Revised Regional Air Quality Strategy (RAQS). These T-tactics are ridesharing, transit improvements, traffic flow improvements, and bicycle facilities and programs.

These four T-tactics were subsequently approved by the San Diego Air Pollution Control Board (APCB) and are the TCMs in the 1982 SIP for Air Quality. The U.S. EPA approved this SIP revision for the San Diego Air Basin in 1983, and these four T-tactics remain the federally approved TCMs for the San Diego region.

The California Clean Air Act required the preparation of a 1991 RAQS, including TCMs. During 1991 and 1992, SANDAG, in cooperation with local agencies, transit agencies, and the Air Pollution Control District (APCD), developed a Transportation Control Measures (TCM) Plan. The TCM Plan was approved by SANDAG on March 27, 1992.

On June 30, 1992, the APCB amended the TCM Plan and adopted the 1991 RAQS, including the amended TCM Plan. TCMs included in the 1991 RAQS include the four T-tactics described above, as well as a transportation demand management (TDM) program, vanpools, high-occupancy vehicle

(HOV) lanes, and park-and-ride facilities. On November 12, 1992, the California Air Resources Board (CARB) gave approval to the 1991 RAQS, including the TCMs.

The 1995 Triennial RAQS Update subsequently deleted the Employee Commute Travel Reduction Program contained in the TDM program because the program was no longer required under federal law. Assembly Bill 3048 (Statutes of 1996, Chapter 777) eliminated all state requirements for mandatory trip reduction programs. As a result, the Student Travel Reduction Program, the Non-Commute Travel Reduction Program, and the Goods Movement/Truck Operation Program proposed in the 1991 RAQS were no longer statutorily mandated and were deleted from the RAQS in 1998. Neither the 2001 nor the 2004 Triennial RAQS Revisions made changes to measures related to mobile sources or the TCM Plan.

#### AIR QUALITY CONFORMITY REQUIREMENTS

SANDAG, as the Metropolitan Planning Organization (MPO), and the U.S. Department of Transportation (DOT), must make a determination that the 2004 RTIP conforms to the applicable SIP. Conformity to the SIP means that transportation activities will not create new air quality violations, worsen existing violations, or delay the attainment of the National Ambient Air Quality Standards (NAAQS).

Based upon the U.S. EPA's Transportation Conformity Rule, as amended, conformity of transportation plans and programs, including the 2004 RTIP Amendment No. 1, is determined according to the 1990 Clean Air Act Amendments (CAAA) [Section 176(c)(3)(A)] if the following is demonstrated:

- 1. The RTIP provides for the timely implementation of the TCMs contained in the adopted SIP.
- 2. A quantitative analysis is conducted on the cumulative emissions of projects programmed within the RTIP, including all regionally significant, capacity-increasing projects. Further, implementation of the projects and programs must meet the motor vehicle emissions budget developed by local and state air quality agencies and approved by the U.S. EPA. The 2004 RTIP must be within the budget contained in the 1-Hour Ozone Maintenance Plan (approved by the U.S. EPA in July 2003) and the CO emissions budget established in the CO Maintenance Plan (approved by the U.S. EPA in June 1998).

In addition to the required emissions tests, consultation with transportation and air quality agencies is required. The consultation process followed to prepare the air quality conformity analysis complies with the San Diego Transportation Conformity Procedures adopted in July 1998.

Interagency consultation involves SANDAG, the APCD, Caltrans, CARB, the U.S. DOT, and the U.S. EPA, which form the San Diego Region Conformity Working Group (CWG).

Consultation is a three-tier process that:

- 1. formulates and reviews drafts through a conformity working group;
- 2. provides local agencies and the public with opportunities for input through existing regional advisory committees and workshops; and

3. seeks comments from affected federal and state agencies through participation in the development of draft documents and circulation of supporting materials prior to formal adoption.

SANDAG consulted with the San Diego Region CWG for the preparation of the air quality analysis of the 2004 RTIP Amendment No. 1. The schedule for the development of the 2004 RTIP as well as criteria and procedures for determining conformity of this amendment were presented at the CWG meeting in August 2004. SANDAG also followed interagency consultation procedures for exempt projects.

The quantitative emissions analyses for the 2004 RTIP Amendment No. 1 were initiated in August 2004 and the results distributed on August 30, 2004, for a 30-day public review and comment period. Exempt projects are identified in the list of projects amended into the RTIP. The San Diego Region Conformity Working Group (CWG) reviewed the draft air quality conformity assessment at its September meeting. The results of the regional emissions analysis indicate that the 2004 RTIP, including Amendment No. 1, meets the air quality conformity requirements.

The SANDAG Board of Directors made a conformity finding and adopted the Final 2004 RTIP on July 23, 2004. U.S. DOT's found the 2004 RTIP to be in conformity on October 4, 2004. On October 15, 2004, SANDAG's Transportation Committee will be asked to make a conformity finding and approve Amendment No. 1 of the 2004 RTIP.

The following sections provide a summary of the air quality conformity analysis of the 2004 RTIP Amendment No. 1 in relation to the above conformity requirements.

### **EXPEDITIOUS IMPLEMENTATION OF TCMS**

The first requirement of the air quality conformity finding is to provide for the expeditious implementation of adopted TCMs, or T-tactics. There are four TCMs that must be implemented in San Diego, which the SIP refers to as Transportation Tactics. They include ridesharing, transit service improvements, traffic flow improvements, and bicycle facilities and programs.

These TCMs were established in the 1982 SIP, which identified general objectives and implementing actions for each tactic. A substantial investment has been made in these TCMs since 1982, and they have been fully implemented. Ridesharing, transit, bicycling, and traffic flow improvements continue to be funded, although the level of implementation established in the SIP has been surpassed. No TCMs have been removed or substituted from the SIP.

The 2004 RTIP, including Amendment No. 1, makes substantial progress in programming funds for implementation of the four adopted TCMs for the San Diego region contained in the 1982 SIP. Table 3-1 shows that TCMs programmed for implementation total approximately \$1.7 billion, or 34 percent of the total funds programmed. Included are \$26.5 million for Ridesharing, \$1.5 billion for Transit Improvements, \$50 million for Bicycle Facilities and Programs, and \$83.3 million for Traffic Flow Improvements.

Based upon this analysis, the 2004 RTIP Amendment No. 1 continues to provide for the expeditious implementation of the four existing TCMs in the 1982 Revised RAQS, which remain the federally approved TCMs for the San Diego region.

Table 3-1

2004 RTIP - San Diego Region (in \$000s)

Transportation Control Measure Projects

RIDESHARING		
SANDAG Regional TDM Program		
RideLink and Regional Vanpool Program	<u> </u>	\$26,509
	Subtotal	\$26,509

Oceanside-Escondido Rail (Sprinter)		\$351,520
I-15 Bus Rapid Transit (Rolling Stock/Stations)		\$59,032
Mid-Coast Corridor Project		\$37,321
Regional Fare Technology		\$39,300
Bus/Rail Vehicles Purchase		\$88,679
Bus/Rail Infastructure		\$94,093
Other Rail Projects		\$60,708
Other Transit Projects (Operations/Planning)		\$313,085
	Subtotal	\$1,539,605
BICYCLE FACILITIES PROJECTS		
Bicycle Facilities	_	\$49,950
	Subtotal	\$49,950
TRAFFIC FLOW IMPROVEMENTS		
Caltrans/SANDAG Traffic Management System Projects		\$45,918
CMAQ/Local Agency Traffic Signal Improvement Projects	_	\$37,346
	Subtotal	\$83,264
Total Transportation Control Measure Projects:		\$1,699,328
Total All Transportation Projects in 2004 RTIP:		\$4,977,958
Share of Transportation Control Measure Projects:		34.1%

### **QUANTITATIVE EMISSIONS ANALYSIS**

The second requirement of the conformity finding is that a quantitative emissions analysis be conducted on the proposed RTIP amendment. The emissions analysis must show that implementation of the 2004 RTIP, including Amendment No. 1, meets the emissions budgets as established in the 1-Hour Ozone Maintenance Plan and the 1998 CO Maintenance Plan.

A quantitative emissions analysis was conducted according to the requirements established in the Transportation Conformity Rule, under Section 93.122(b). Motor vehicle emissions forecasts were produced for the following four analysis years: 2010, 2014, 2020, and 2030.

SANDAG's regional growth forecasts and transportation models, as well as CARB's emissions model, were used to generate the emissions forecasts. Transportation forecasts were developed using the TRANPLAN transportation planning computer package. The four-step transportation modeling process includes trip generation, trip distribution, mode split, and trip assignment. The quantitative emissions analysis was conducted with the EMFAC 2002 model.

All of the proposed capacity-increasing improvements identified in the 2004 RTIP Amendment No. 1 that are on the Regional Arterial System (as defined in the RTP) or the FHWA functional classification system (other Principal Arterials and higher classifications) were modeled.

### **Emissions Budget Analysis**

Table 3-2 provides a summary of the results of the quantitative emissions analysis conducted for the 2004 RTIP Amendment No. 1. This analysis shows that the projected emissions of Reactive Organic Gases (ROG), Oxides of Nitrogen (NOx), and CO meet the applicable motor vehicle emissions budgets.

Table 3-2 2004 RTIP AMENDMENT NO. 1 AIR QUALITY CONFORMITY ANALYSIS

	со		ROG		NOx	
Year	SIP Emissions Budget Tons/Day	CO Emissions Tons/Day	SIP Emissions Budget Tons/Day	ROG Emissions Tons/Day	SIP Emissions Budget Tons/Day	NOx Emissions Tons/Day
2010	1,195	443	46	44	88	84
2014	1,195	343	36	35	66	63
2020	1,195	231	36	27	66	42
2030	1,195	149	36	18	66	25

On July 22, 2004, ARB approved the update of the CO Maintenance Plan for the San Diego region and other urban areas. This plan covers the second ten years of the maintenance period through 2018. The 2003 CO budget for the San Diego region was established at 730 tons per day. This CO budget will become the applicable budget for conformity determinations for 2003 and subsequent years after EPA makes a budget adequacy finding (expected in late Fall 2004). The projected CO emissions from the 2004 RTIP Amendment No. 1 also meet the new 2003 CO budget.

### CONCLUSION

Based upon an evaluation of projects and funds programmed and a quantitative emissions analysis, the 2004 RTIP Amendment No. 1 meets the U.S. EPA transportation conformity regulations contained within the federal guidelines published on August 15, 1997, and subsequent amendments, as well as the requirements of the federal Clean Air Act amendments of 1990.
